

# Solaris Chem Inc.

Solaris Chem R&D Laboratories,  
Quebec, Canada

## About Solaris Chem Inc.

*Solaris* is a company working in the domain of fine organic chemicals, synthesizing materials for the electronic industry as well as for the domain of academic researches since 2007. Our R&D program is mainly focused on the synthesis of custom made semi-conducting polymers, fullerene derivatives, C60, C70, organo-metallic compounds and dyes specially formulated for their used in organic

photovoltaic cells, transistors, organic light emitting diodes and bio technologies. *Solaris* stands out for its rich experiences and knowhow in organic synthesis as well as for its expertise in physical and analytical chemistry. Its members received first class education reinforced with many years of industrial experiences in these domains. *Solaris collaborates with many academical groups*

*around the world and is part of the NSERC-Green Electronic Network (GreEN) of Canada.*

*Solaris*; a trustworthy partner for your endeavors, promising a great service and high quality products. Visit us online at:
